EXPERIENCE

SOFTWARE DEVELOPMENT STUDENT 2024

A client-server app for a car voting poll allows users (clients) to vote on different car models. The server stores votes, manages data, and updates results in real time. Clients interact via a user interface to submit their votes securely.

SOFTWARE DEVELOPMENT STUDENT 2023

An online booking system for local travel allows users to select routes, choose travel dates, and purchase tickets through a website or app. The system processes payments, generates digital tickets, and provides real-time availability, offering a smooth booking experience.

EDUCATION

DIPLOMA IN ICT APPLICATION DEVELOPMENT 2025

Cape Peninsula University of Technology

NATIONAL SENIOR CERTIFICATE 2021

Buchule Technical High school

ACTIVITIES

I'm passionate about **video games**, exploring game design and development through **computer programming**. I enjoy coding games in languages like Python and Java. Additionally, I love **computer editing**, creating digital content such as videos and graphics using tools like Adobe Photoshop and Premiere Pro, blending creativity with technical skills.
